

The Pure Power Tab contains powerful bacteria and enzymes that are ideally suited for breaking down waste and maintaining holding tanks in a clean, odor-free condition. These convenient and easy to use tablets are safe, natural, and 100% biodegradable. Bacteriological products such as the Pure Power Tab are much preferred over formaldehyde products by dump station facilities, RV parks, and state and national parks because they actually benefit septic systems and waste treatment facilities.

Directions:

One Tablet Treats Up To 40 Gallons

First time use: If chemical treatments such as formaldehyde have been used in tank, first time results may vary, depending upon levels of sludge and chemical build-up.

For optimal results:

1. Flush tank thoroughly.
2. Add one tablet for each 40 gallons of capacity and fill tank with water.
3. Let stand for at least 8 hours.
4. Drain and flush tank. Follow normal usage directions.

Black Tank

Simply drop tablet(s) into toilet and flush with enough water to cover bottom of holding tank (approximately 1 gallon).

Gray Tank

Break tablet(s) into a few pieces and flush down any convenient drain with enough water to cover bottom of tank (approximately 1 gallon).

Septic Tank For routine maintenance of a healthy septic system, drop 2-3 tablets per month into any drain.

We recommend **Micro Power** for your toilet, sink and shower cleaning needs.

Note: For temperatures above 105° F it may be necessary to double the dose for odor control.

Ingredients: Bacteria, enzymes, natural surfactants, and lemon fragrance
